Claims 59-64 and 66-78 have been examined.

Allowable Subject Matter

Claims 59-64 and 66-68 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Wood et al. (U.S. Patent 5,891,035), discloses a method for providing operational protocols to medical diagnostic systems, the method comprising the steps of: storing a protocol on a machine readable medium, the protocol including at least one operating parameter for a medical diagnostic system (column 2, lines 8-19 and 30-49; column 7, lines 1-43); displaying user viewable indicia descriptive of the protocol at a medical diagnostic location (column 2, lines 8-19 and 30-49; column 7, line 1, through column 8, line 4); and performing a protocol exchange transaction including selecting the protocol via a user interface and loading the protocol at the medical diagnostic location from the machine readable medium via a network connection to the medical diagnostic location (column 6, line 15, through column 8, line 4; Figures 1 and 2). Wood does not disclose storing an accounting record of the transaction, but Reeder (U.S. Patent 5,852,812) teaches doing this (column 14, lines 25-37). Wood discloses exemplary images obtainable via the diagnostic system (column 9, line 67, through column 10, line 43) but does not disclose that the user viewable indicia include an exemplary image obtainable via the protocol, nor does Reeder or any other prior art of record teach this. The exemplary image found at the diagnostic end of Wood's process cannot properly be moved to the protocol selection process at the front of Wood's

process, absent teaching in the prior art, which is lacking. Font selection in Microsoft Word shows the name of each font which a user can choose to select printed in that font, but this is not analogous art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 69-73 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Wood et al. (U.S. Patent 5,891,035), discloses a method for obtaining an operational protocol for a medical diagnostic system or institution, the method comprising: performing a transaction by accessing data from a protocol library defining the desired protocol via a network link between the diagnostic system or institution and the library, and transmitting the data from the library to the diagnostic system (column 7, lines 1-58). Wood does not expressly disclose ordering a protocol by viewing a protocol list on a user interface at the medical diagnostic system, and selecting a desired protocol from the list, but does disclose referencing preferred presets (protocols) from an HTML page for retrieval over the Internet or another network (column 7, lines 20-26), which comes close. Moreover, it is well known to view lists of products or files that may be ordered, and select the desired item from the list, as taught, for example, by Wyatt (U.S. Patent 6,041,411), (column 4, lines 46-52; column 9, lines 29-46; and column 9,

line 54, through column 10, line 5). Wood does not disclose storing an accounting record of the transaction, but Reeder (U.S. Patent 5,852,812) teaches doing this (column 14, lines 25-37). Wood discloses exemplary images obtainable via the diagnostic system (column 9, line 67, through column 10, line 43) but does not disclose that the user viewable indicia include an exemplary image obtainable via the protocol, nor does Reeder or any other prior art of record teach this. The exemplary image found at the diagnostic end of Wood's process cannot properly be moved to the protocol selection process at the front of Wood's process, absent teaching in the prior art, which is lacking. Font selection in Microsoft Word shows the name of each font which a user can choose to select printed in that font, but this is not analogous art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 74-78 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Wood et al. (U.S. Patent 5,891,035), discloses a system for providing operational protocols to a medical diagnostic station or institution, the system comprising: at least one storage device for storing data defining a protocol, the protocol including data for controlling operation of the diagnostic station (column 2, lines 8-19 and 30-49; column 7, lines 1-46); a messaging module in the diagnostic station or the

institution for formulating messages containing data descriptive of a desired protocol (column 7, lines 20-29); and communications circuitry for establishing a network link between the diagnostic station or institution and a remote protocol provider, for transmitting data descriptive of the desired protocol, and for receiving a reply from the remote protocol provider (column 2, lines 8-19 and 30-49; column 3, line 27, through column 4, line 16; column 7, line 1, through column 8, line 4). Wood discloses exemplary images obtainable via the diagnostic system (column 9, line 67, through column 10, line 43) but does not disclose that the user viewable indicia include an exemplary image obtainable via the protocol, nor does Reeder or any other prior art of record teach this. The exemplary image found at the diagnostic end of Wood's process cannot properly be moved to the protocol selection process at the front of Wood's process, absent teaching in the prior art, which is lacking. Font selection in Microsoft Word shows the name of each font which a user can choose to select printed in that font, but this is not analogous art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Derzay et al. (U.S. Patent 6,578,002) disclose a medical

diagnostic system service platform. Davis et al. (U.S. Patent 6,631,353) disclose sonometry and densitometry medical diagnostic devices enabled for per-use patient examinations. Zavisian (U.S. Patent 6,684,092) discloses a system for facilitating pathological examination of a lesion in tissue.
